Weight	24 - 92 Tons
Freeboard	40 cm - 60 cm
Buoyancy	400.0 - 800.0 kg/m <sup>2</sup>
Breaking Loads	50,000 kgf (x4 units)

All concrete pontoons are produced using marine type sulfate resistant concrete.

High density EPS (Expanded Polystyrene Foam) is used inside.

Concrete floating breakwaters are the most preferred coastal protection products. Thanks to its cement based raw material, it is the most durable and long-lasting solution on water.

We manufacture concrete floating breakwater within our product line. It offers the option to specifically produce for the needed dimensions and details to perfectly match your project requirements.
